

DESOTEC - Assistant Financial Controller - Darlington, PA

Are you an experienced Assistant Financial Controller that has at least 10 years of experience dealing with Financial and would like to work for a sustainable company?

As our Assistant Financial Controller you will be a true "Business Partner" working with the US Controller guiding the business towards its strategic objectives by overseeing; Financial Procedures and Statutory Compliance; Budget and Reporting; Taxes and Process change; and the Treasury and Banking Relationships necessary to run the business in the most effective way. In this job, you'll be reporting to the US Financial Controller and will directly work with different internal and external stakeholders: the Group Finance Director, Group Controller, Audit, as well as stakeholders in the Corporate office in Belgium...

As the Assistant Financial Controller USA at DESOTEC, you'll get the chance to:

- Conduct monthly and yearly closings for the US business in compliance with legal requirements
- Work closely with the team in Europe, supporting the consolidation of the different entities and for the consolidated reporting to all stakeholders (bank & shareholder reporting);
- Take responsibility for the accounting and the financial reporting of the US hubs (in close collaboration with our local partners) and the transfer pricing streams.
- Be responsible for audits, tax and subsidy requests/follow up
- Ensure compliance with legal, tax and statutory requirements
- Support a team of +/- 4 finance colleagues (including the AR/AP team and eventually senior accountants as the team grows
- Drive continuous improvement, optimization, and documentation of financial and accounting processes
- Support the finance transformation efforts at US headquarters and locations by transitioning from transactional into strategic business-partner operating mode
- Help with ERP Implementation; defining financial processes including

GL,AP,AR, controlling and analysis for local and group level

Who are you as the Assistant Financial Controller in the USA at DESOTEC?

- Â· You have minimum of 10+ years of experience in Accounting and Controlling within an industrial international company; College degree or equivalent in accounting, finance, or similar field. You are an experienced team leader and a true team player
- Â· You have solid US GAPP, IFRS, consolidation and tax experience
- Â· You have experience with taxes and fully understand US tax laws
- Â· You are hands-on, proactive, and reliable with strong analytical skills
- Â· You have a discrete, independent, and critical approach
- Â· You are very strong with Excel
- Â· Preferred: you have experience with Navision or Microsoft Dynamics

Whatâ€™s in it for you as the Assistant Financial Controller at DESOTEC? It goes without saying that in exchange for your unbridled dedication and enthusiasm, you will get a lot in return. Too much to mention in fact. Below is an attempt to summarize exactly what we can offer you as the Assistant Financial Controller at DESOTEC.

Important side note: this list is not exhaustive!

- Â· The chance to make your mark within a dynamic, fast-growing, and results-oriented company that makes a difference for the environment and climate
- Â· An environment that values you for your work and as a person
- Â· Personal and professional growth through training
- Â· Career development opportunities according to your own interests and the needs within DESOTEC
- Â· A fair and high-quality salary package with many benefits such as self-managed PTO, 401k match, Health, Dental, Vision, Disability, Life, and other insurances all provided
- Â· A flexible work model with flexible working hours.

To protect the planet â€“ thatâ€™s our mission at DESOTEC.

Desotec's **sustainable mobile filtration solutions** based on activated carbon are deployed for the treatment of Air Emissions, Wastewater, Remediation, Chemicals and Biogas. Through a **rental model**, our filters are distributed to production companies globally. Once the filter is saturated, it is replaced, and the spent carbon sent for **recycling & re-use**. That is how we **unburden our customers** of the administrative, moral, logistical and ecological consequences of their purification needs. The result: they can focus 100% on what really counts

- sustainable production.

That is how we fight for (y)our brighter future!
