

DESOTEC – Field Service Technician

Desotec is now hiring a Field Technician for our Houston, TX Service Hub

Job functions:

- Execute carbon exchanges at customer sites with slurry tankers. While at the customer site, you will operate the tanker, air compressor, customer equipment, and various forms of man lifts if needed
- Transport the Hurricane vacuum unit to and from customers' sites with a truck. While at the customer's site, you will be responsible for using the Hurricane to remove the spent carbon from the customer's vessel. Once the vessel is empty, you will use a forklift to fill it with bulk bags of fresh carbon. Loading and unloading techniques may vary
- Operate specially designed mobile filter hydraulic trailer at customer's sites to exchange spent filters with fresh ones
- Assist with loading and unloading filters and tankers at the Houston Hub

Core Responsibilities:

- Create and sustain a safe working environment and culture within the company
- Communicate well with customers
- Must be able to work well in a team environment
- Ensure company property is well-maintained
- Desire to learn

Skill Requirements:

- Class A CDL license and experience
- Perform physical functions per job requirements
- Solution-oriented mindset
- Proficient with mechanical tools and equipment

Beneficial Qualities:

- 2 years Field Service experience
- Hazardous Materials Endorsement
- Dry bulk experience
- HAZWOPER 40
- Industrial Vacuum Experience

What's in it for you as a Expert Field Technician at DESOTEC?

- The chance to make your mark within a dynamic, fast-growing and results-oriented company that makes a difference for the environment and climate
- An environment that values you for your work and as a person
- Personal and professional growth through training
- **3 weeks of paid vacation**
- Health Insurance / Dental / Vision
- **Health Savings Account**
- Dollar-for-Dollar 401k match up to 4% of annual salary
- Paid Holidays
- Paid parental leave
- Flexible Spending Account Options

Our Purpose

DESOTEC is on a mission to protect our planet. We provide mobile activated carbon filtration solutions for purifying air, water, and other gases and liquids. Our circular model reactivates spent carbon, making our solutions not only effective—but sustainable.
