To protect the planet – that’s our mission at DESOTEC.

Desotec's **sustainable mobile filtration solutions** based on activated carbon are deployed for the treatment of Air Emissions, Wastewater, Remediation, Chemicals and Biogas. Through a **rental model**, our filters are distributed to production companies globally. Once the filter is saturated, it is replaced, and the spent carbon sent for **recycling & re-use**. That is how we **unburden our customers** of the administrative, moral, logistical and ecological consequences of their purification needs. The result: they can focus 100% on what really counts - sustainable production.

That is how we fight for (y)our brighter future!
