From air, soil and gas to water and other liquids: at DESOTEC, we purify through **sustainable, mobile filter solutions** based on activated carbon. Through a smart **rental model**, our filters are distributed to production companies all over Europe. When the carbon inside of the filters is saturated, we make sure to retrieve it for **reactivation**. That is how we **unburden our customers** of the administrative, moral, logistical, and ecological consequences of their purification needs. The result: they can focus 100% on what really counts - sustainable production.
